Commercial License

posted by gauravpalgayatri on September 3, 2019 at 2:42 PM

Hi, I want to know about Commercial License for TheMovieDB. If Commercial License is available then what is the fee or charges for this service.

I have register with The Mobile Db and got the API Key, but this API Key is for non Commercial, So i want to know i am able to use this API world wide or there is a another key available as a Commercial License.

Thanks, Gaurav Pal

AFAIK commercial API keys are not released and you can use your developer API key for your commercial application as long as you attribute TMDb as the source of the data and/or images. However, TMDB reserve the right to charge for the commercial API key in the future.

You can find more in our API FAQ [here](#).
